

## EMERGENCY RELOCATION RELEASE

The reservoirs of the Muskingum Watershed Conservancy District, hereafter referred to as MWCD, were created in 1933 for the primary purpose of flood protection. For that reason, fluctuation in water elevation may occur and affect the recreational facilities and activities conducted at these reservoirs.

In cooperation with the MWCD and its employees and designated agents in maintaining flood protection activities, and in consideration of being granted a camping and/or docking permit, I hereby agree to hold harmless and indemnify MWCD and its employees or designated agents from any liability for any damage to property or person that may result from the EMERGENCY relocation of my motor vehicle, mobile home, camping unit, watercraft or other personal property from areas impacted by flood protection activities or any other situation deemed an emergency by the Park Manager.

*This form must be completed and signed by permit holder or the camping and/or docking permit will not be processed.*
